Open Source - Web-Based and Mobile Survey Tool for the Collection of Real-Time Data in the Field
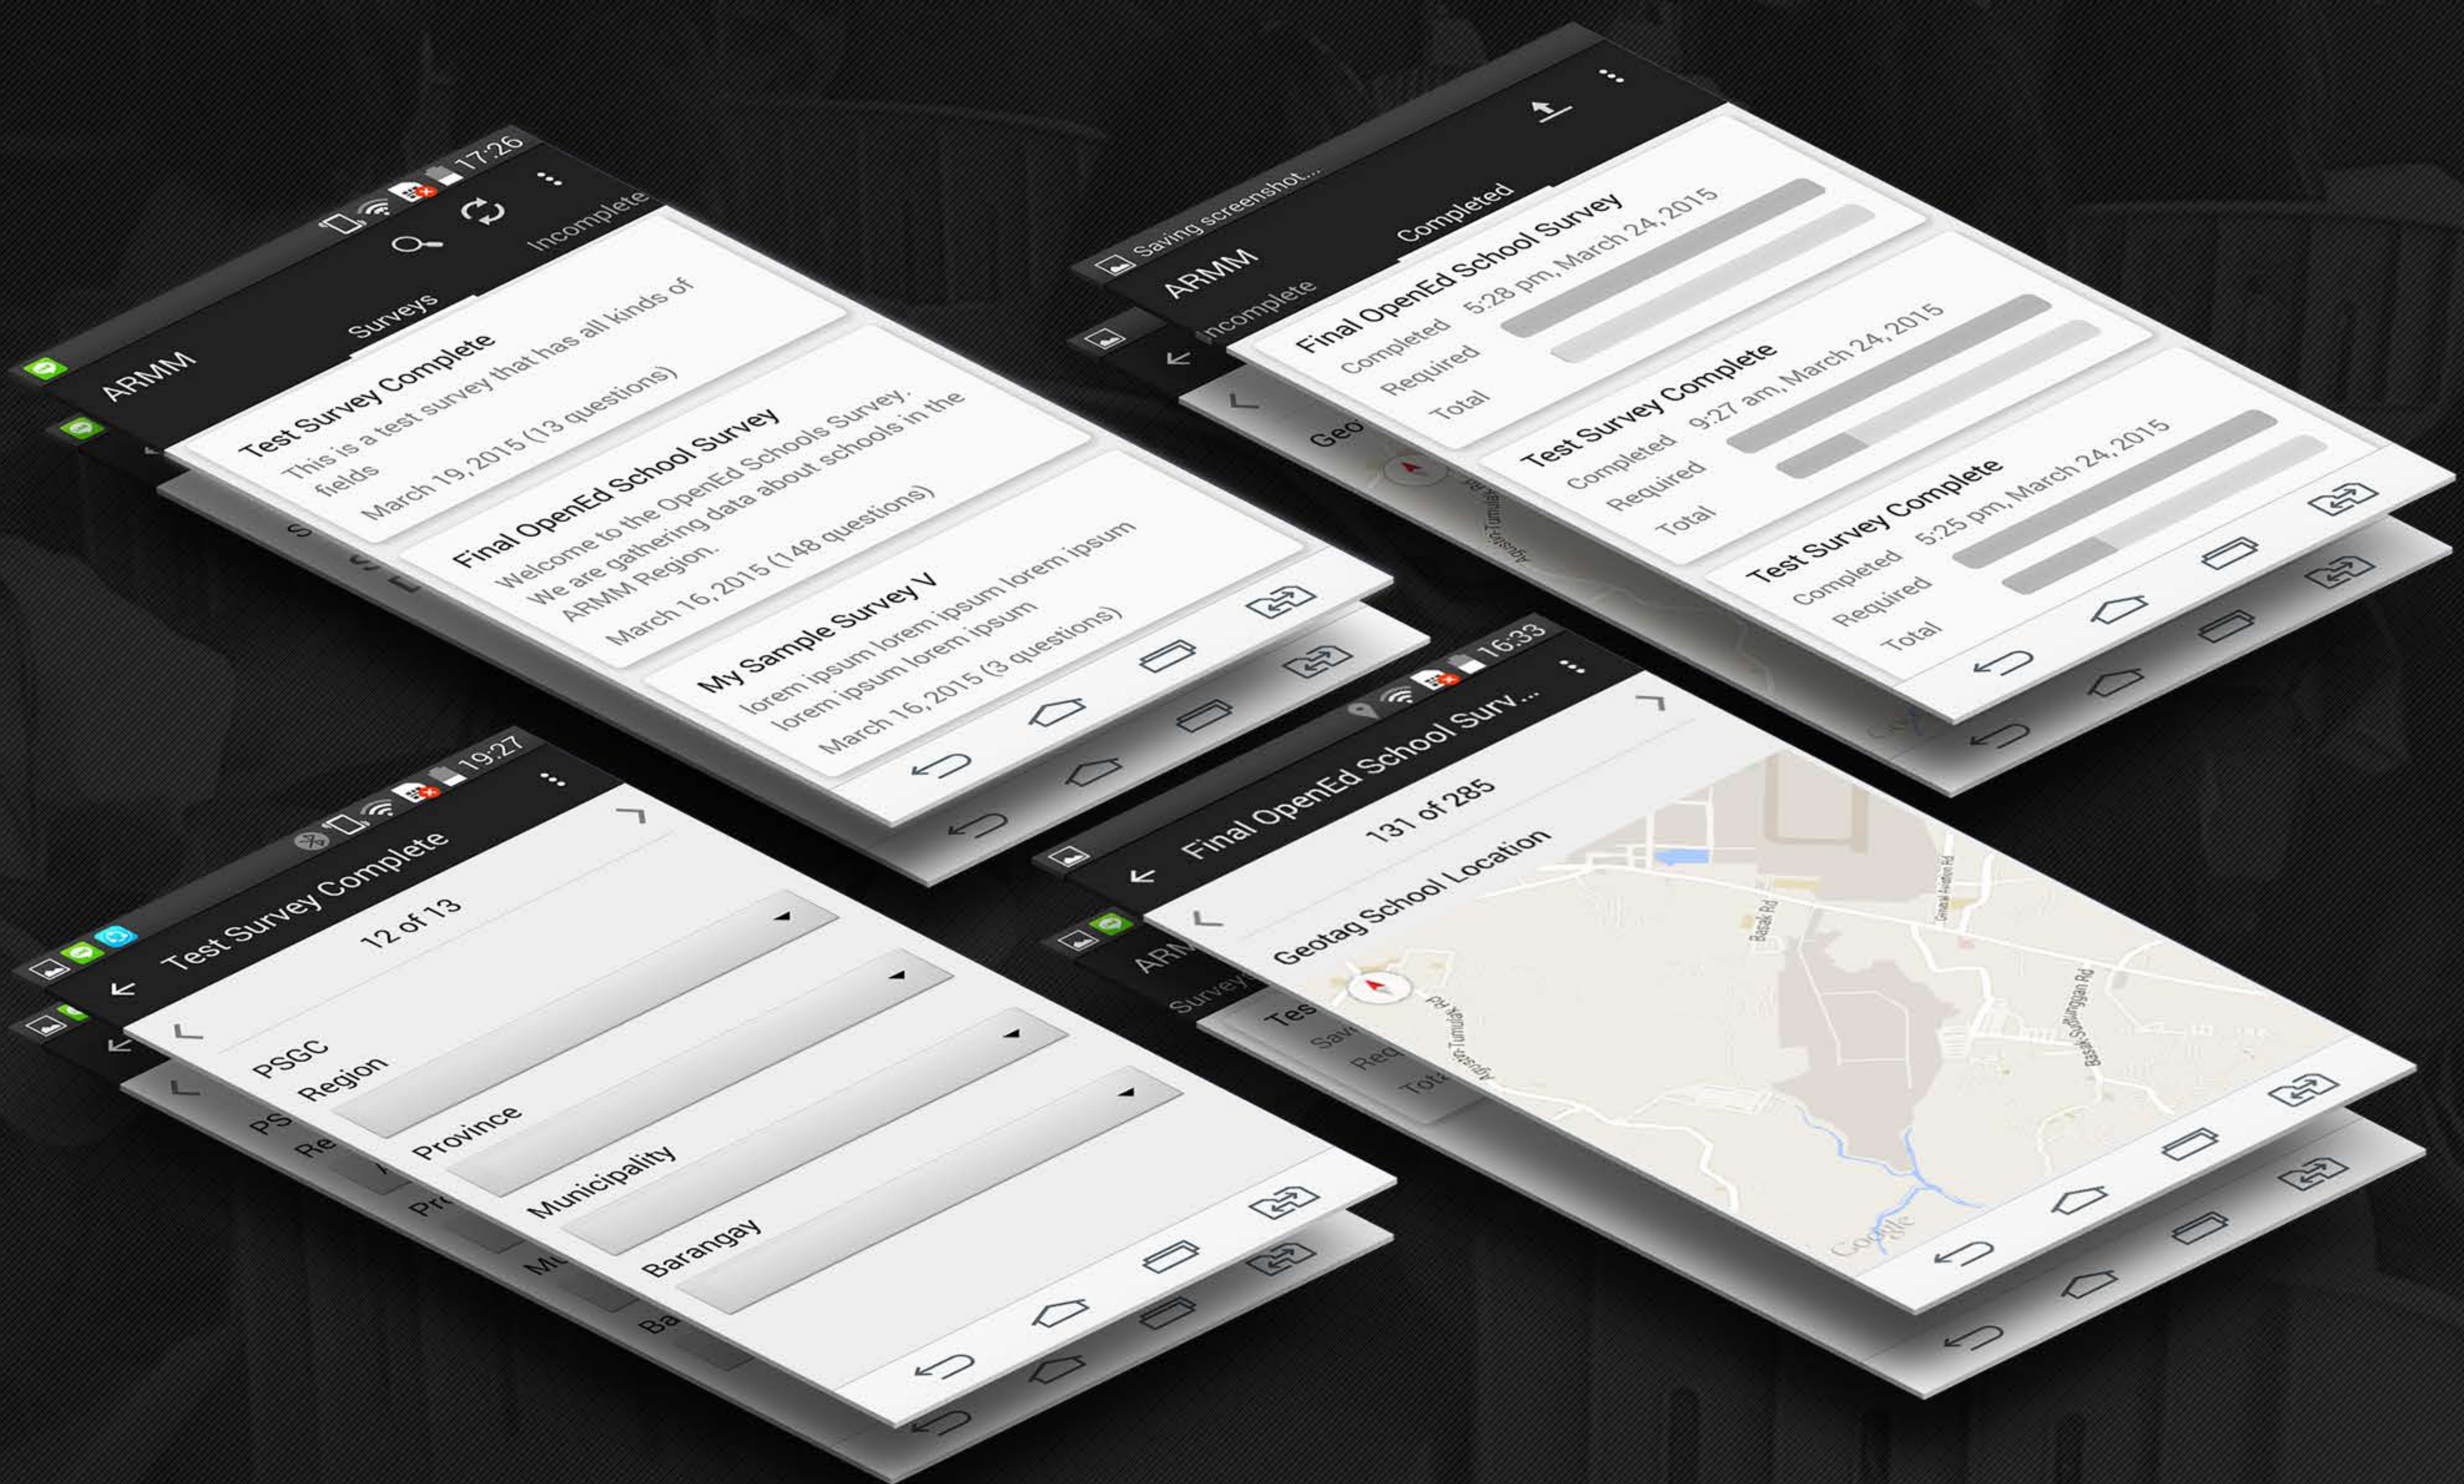

The Web-Based and Mobile Survey Tool is committed to disclosing the exact geographic location of schools and taking stock of basic infrastrutcure conditions and presence of teachers and students. The tool may also be used for other verticals that could benefit from real-time data collection.
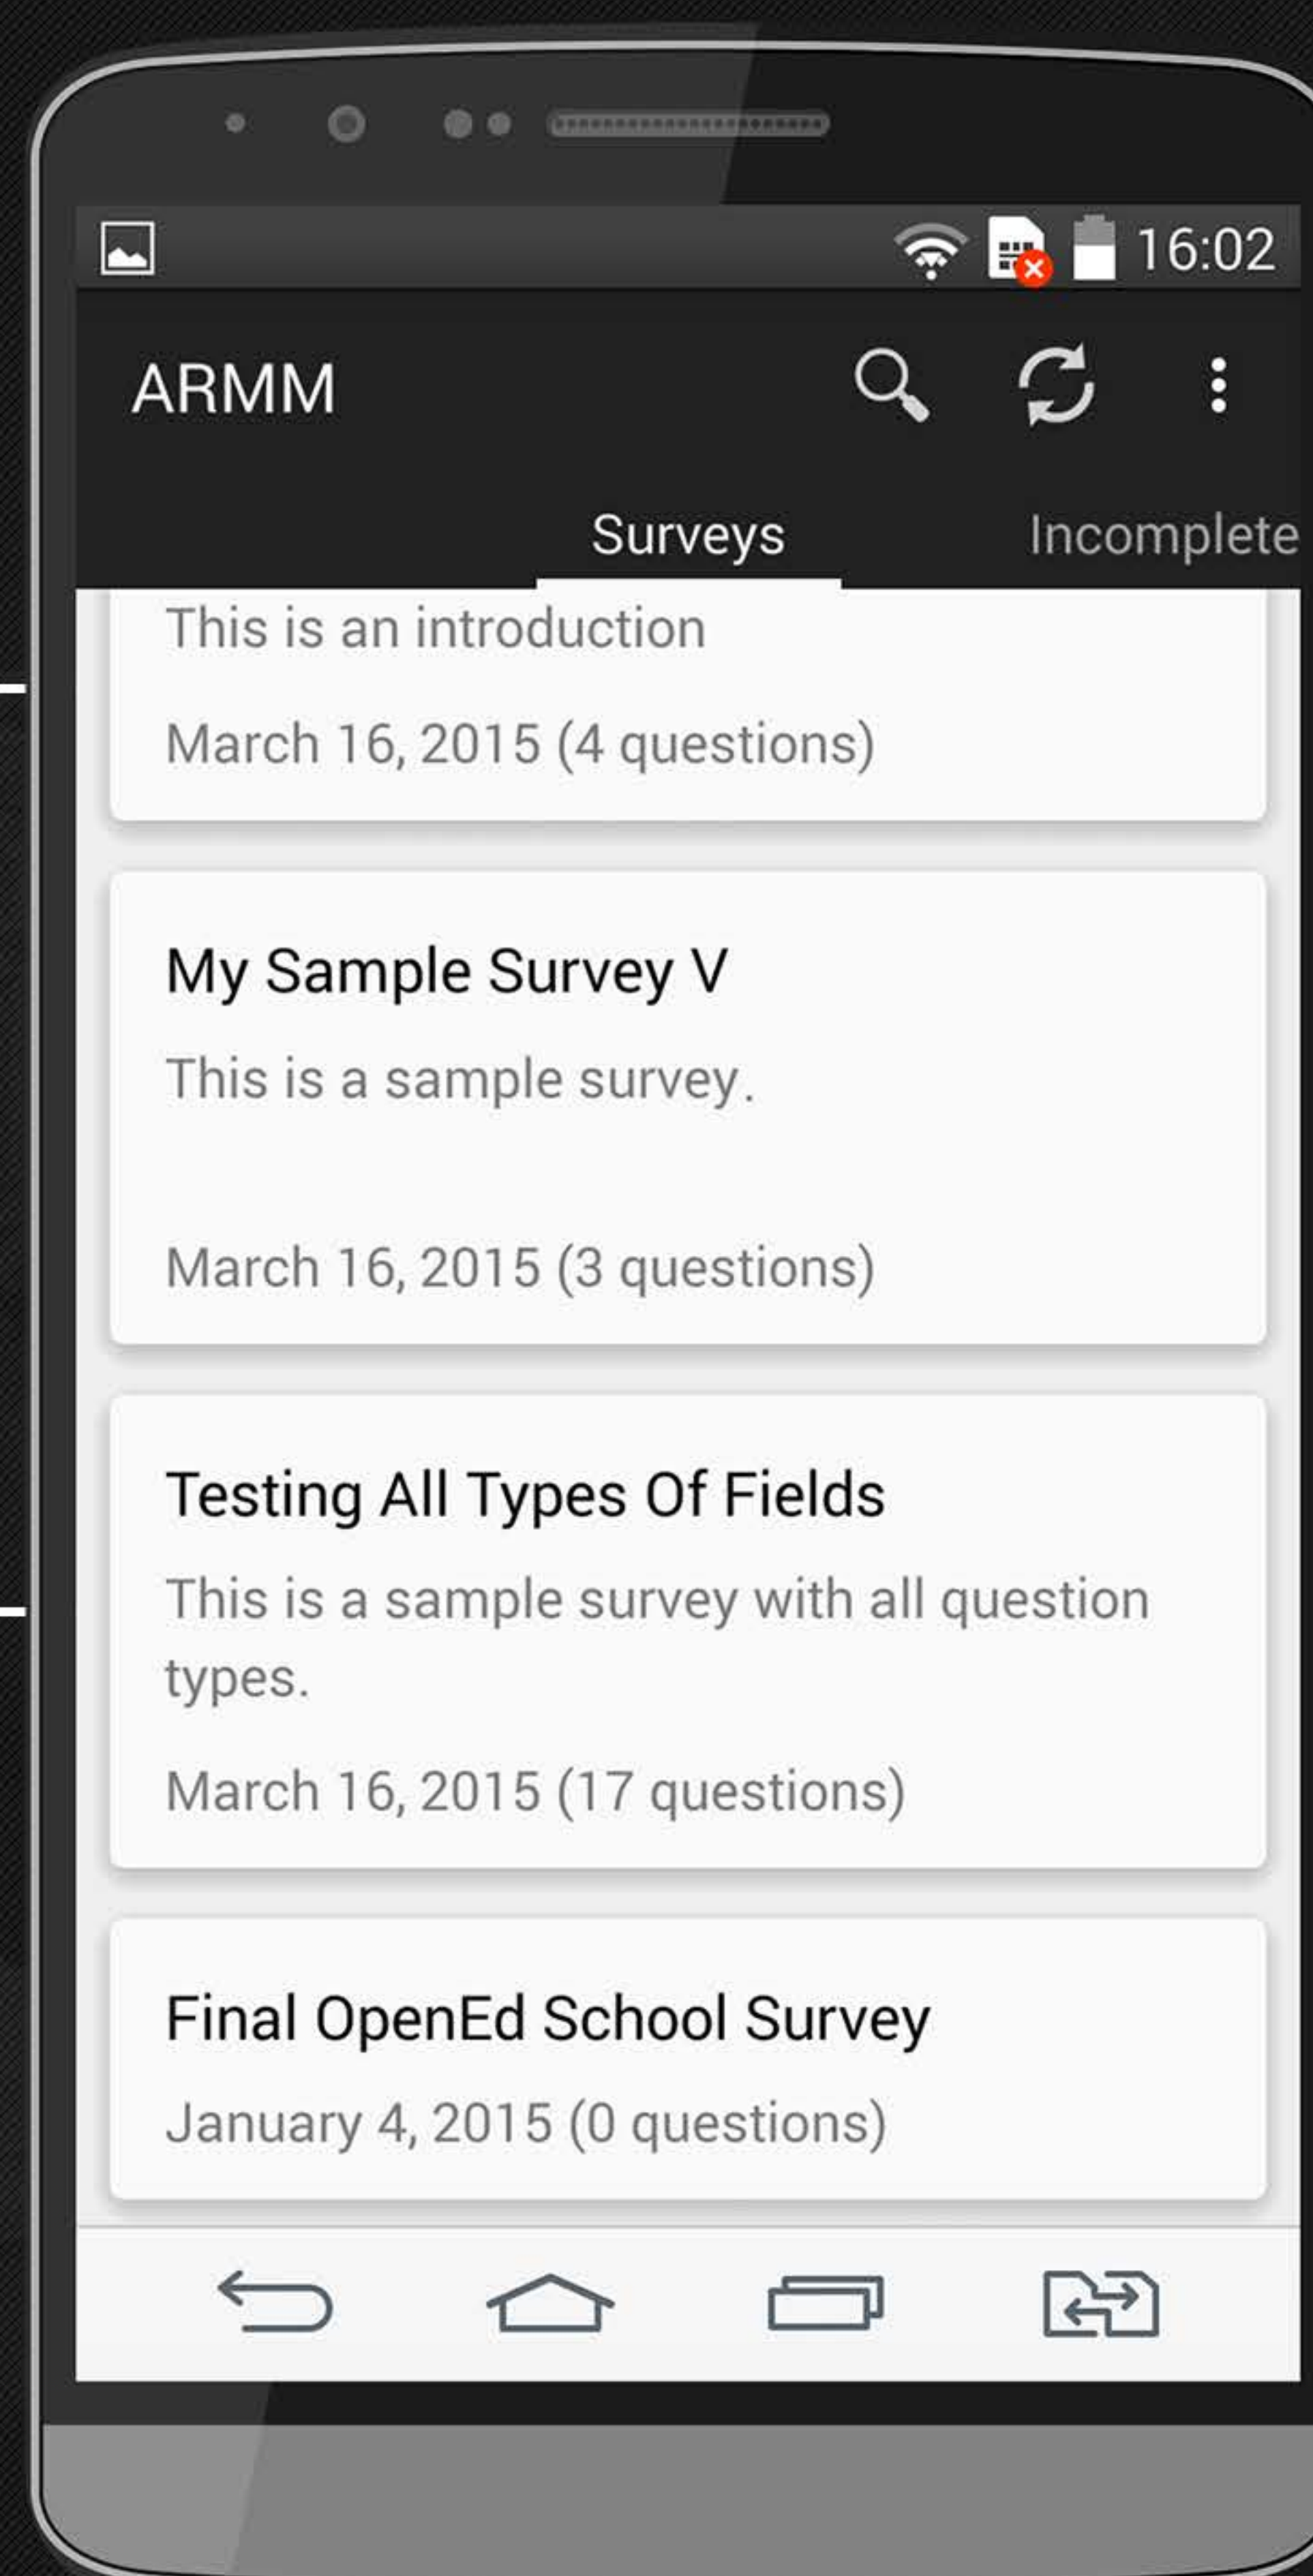

Surveys

The Survey Lists

SYNCED SURVEYS

Surveys are loaded from the ARMM platform and saved locally on the device. This makes viewing and answering surveys available even without internet connection or phone signal.

SURVEY LIST

This displays all available surveys in the platform. This also include the date of publication, and the total number of connections.

Survey Fields

Featured Survey Fields

⊜ NORMAL TYPE QUESTION

There are different type of questions including:

- number values

- text questions

- multiple choice questions & more

⊜ GEOLOCATION QUESTION

The geolocation question type displays the map where you can zoom in or zoom out on the school location for precise geotagging.*

If location services is enabled, the map defaults to your current location.

⊜ PSGC TYPE QUESTION
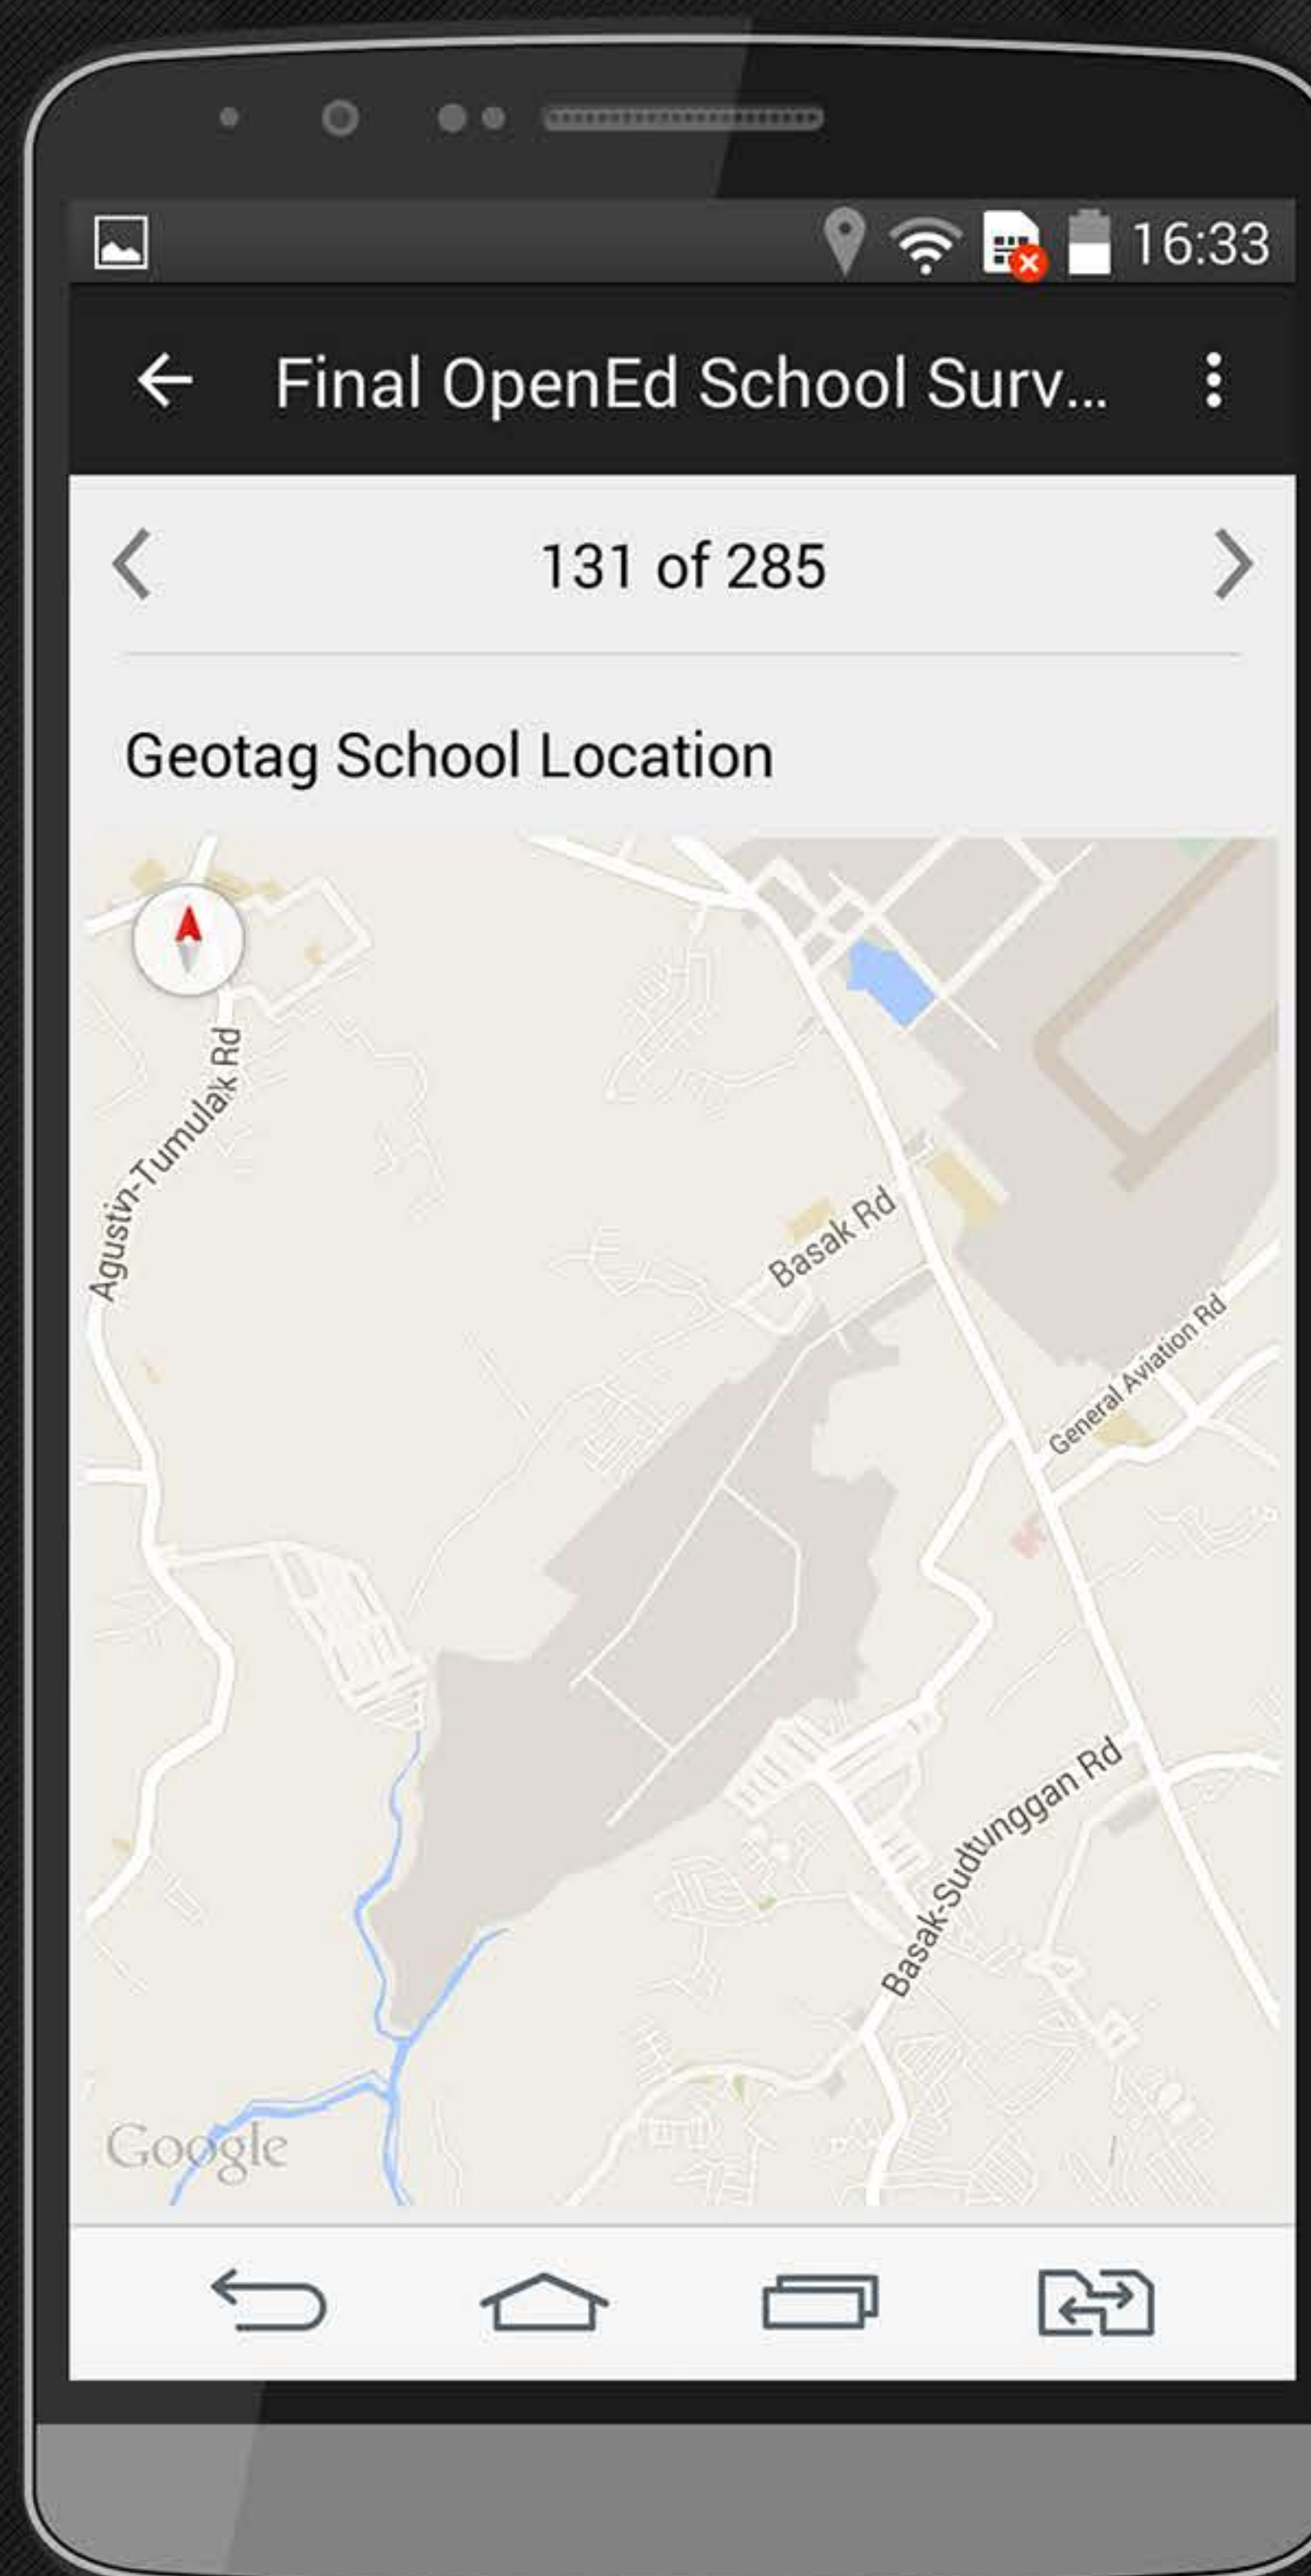

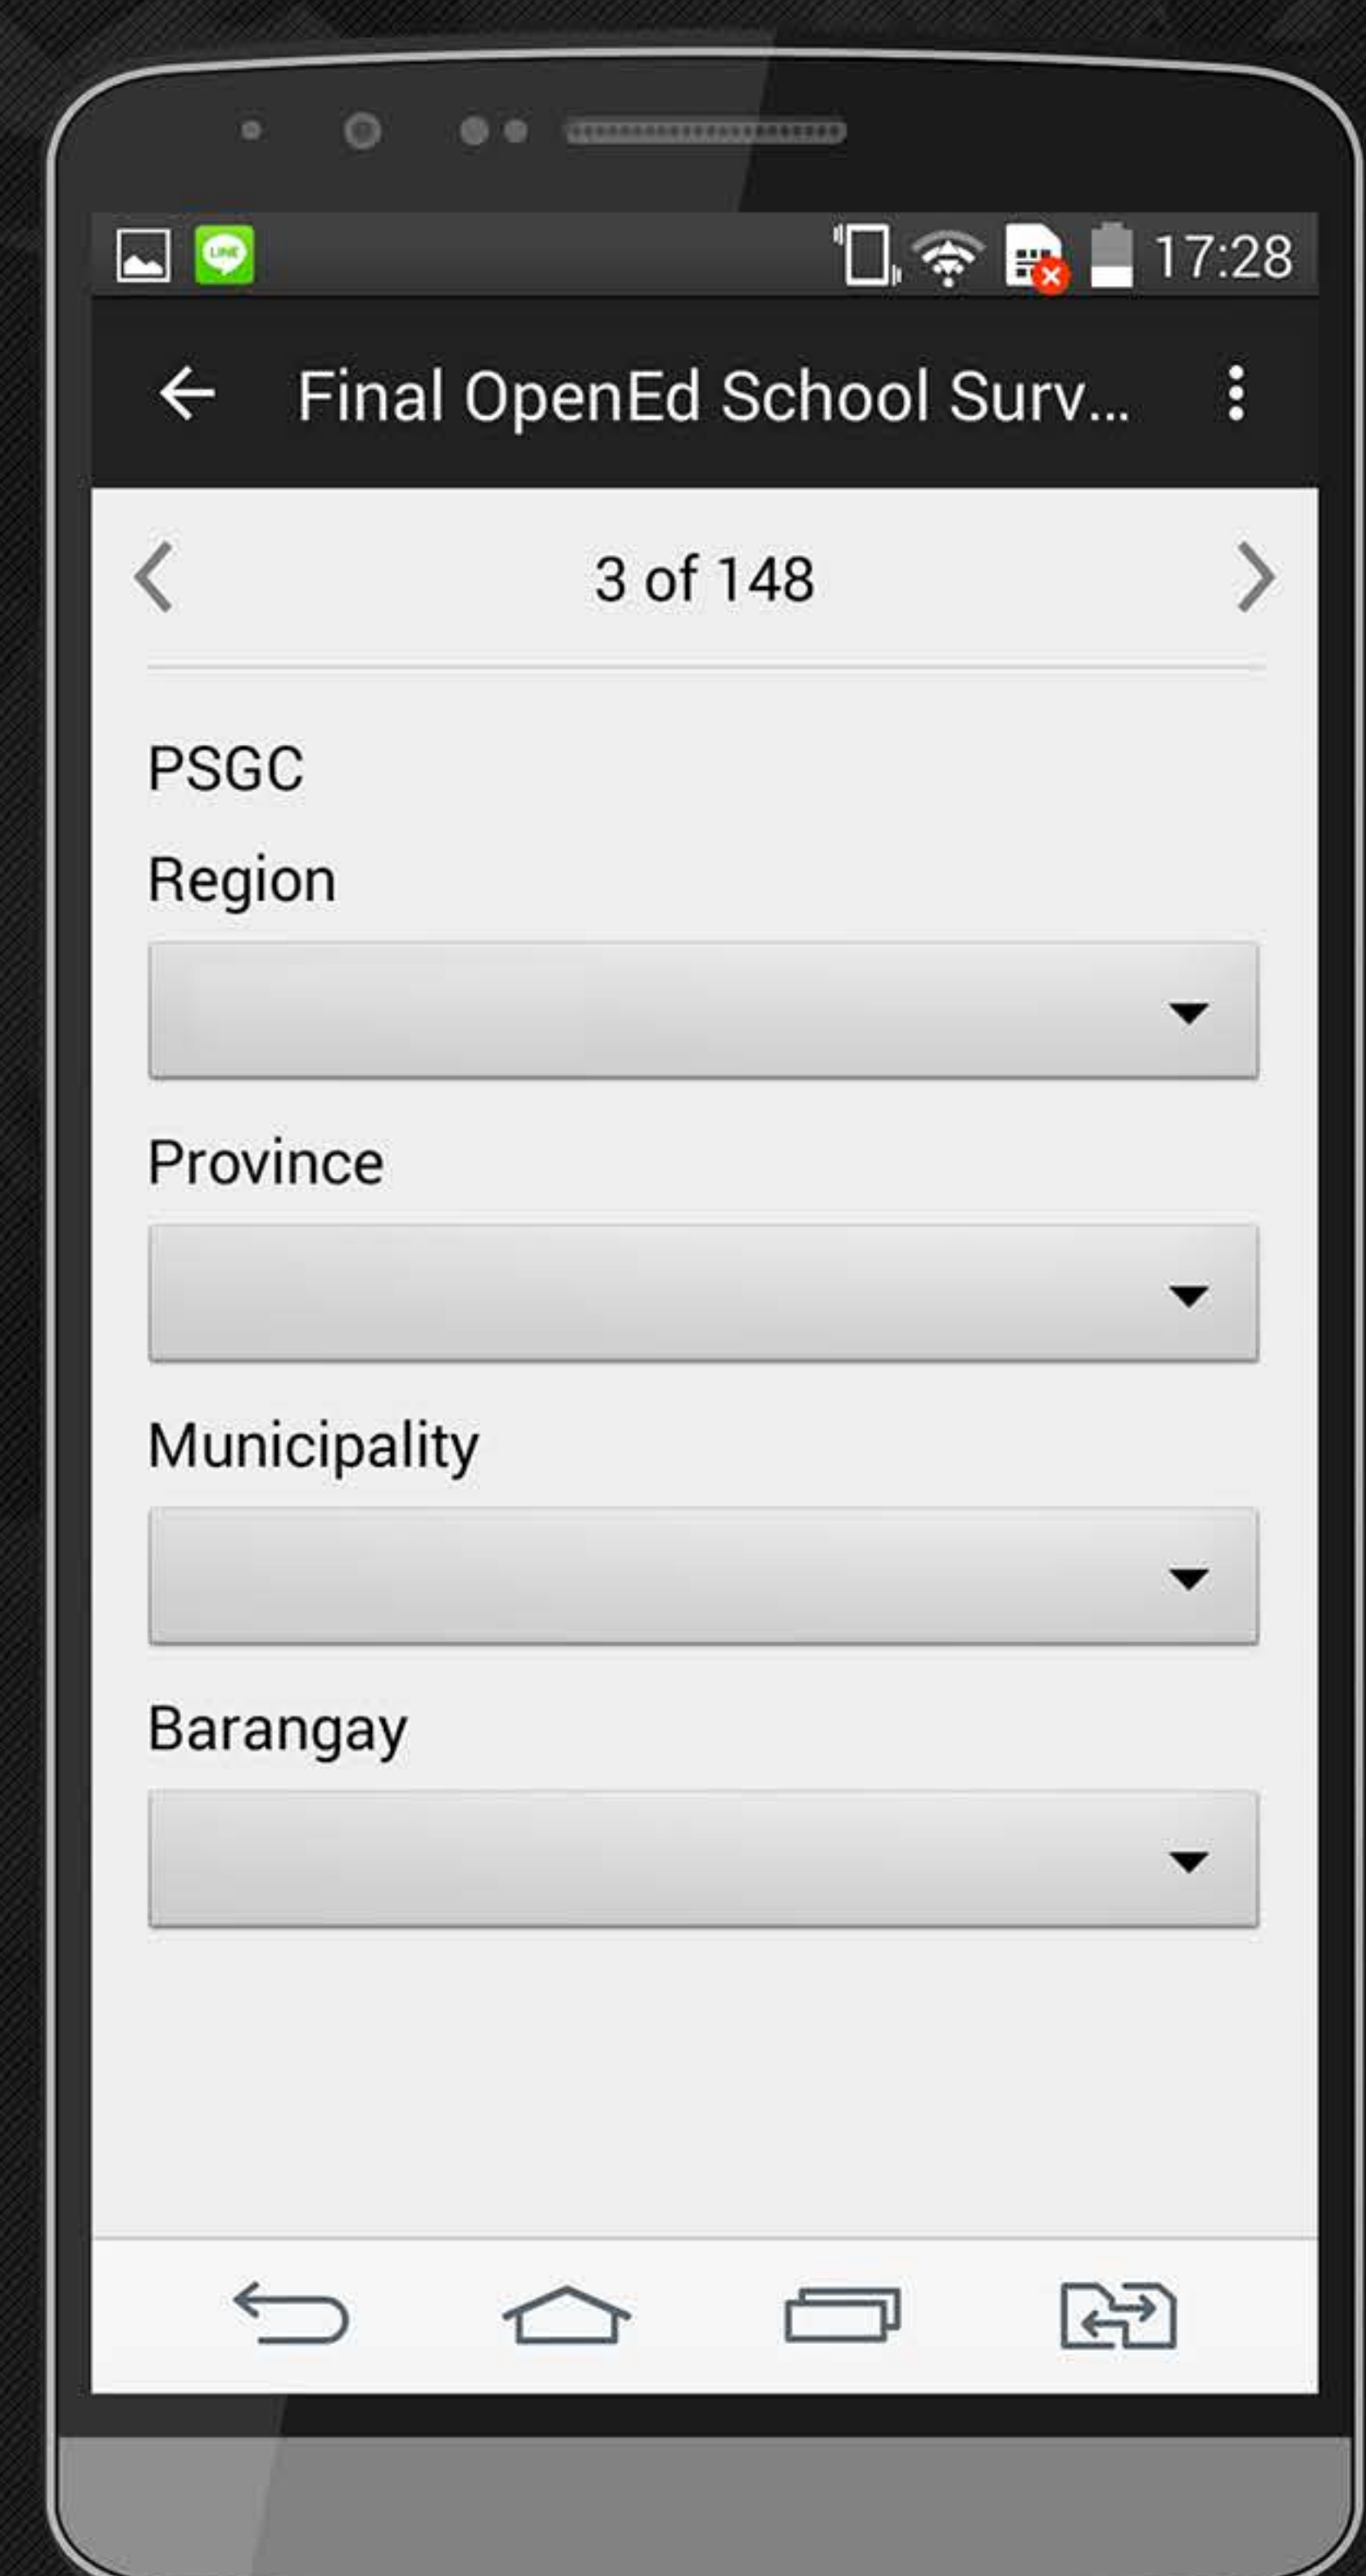

The PSGC question type provides a heirarchical series of dropdowns that allow you to select the region, province, municipality and barangay.
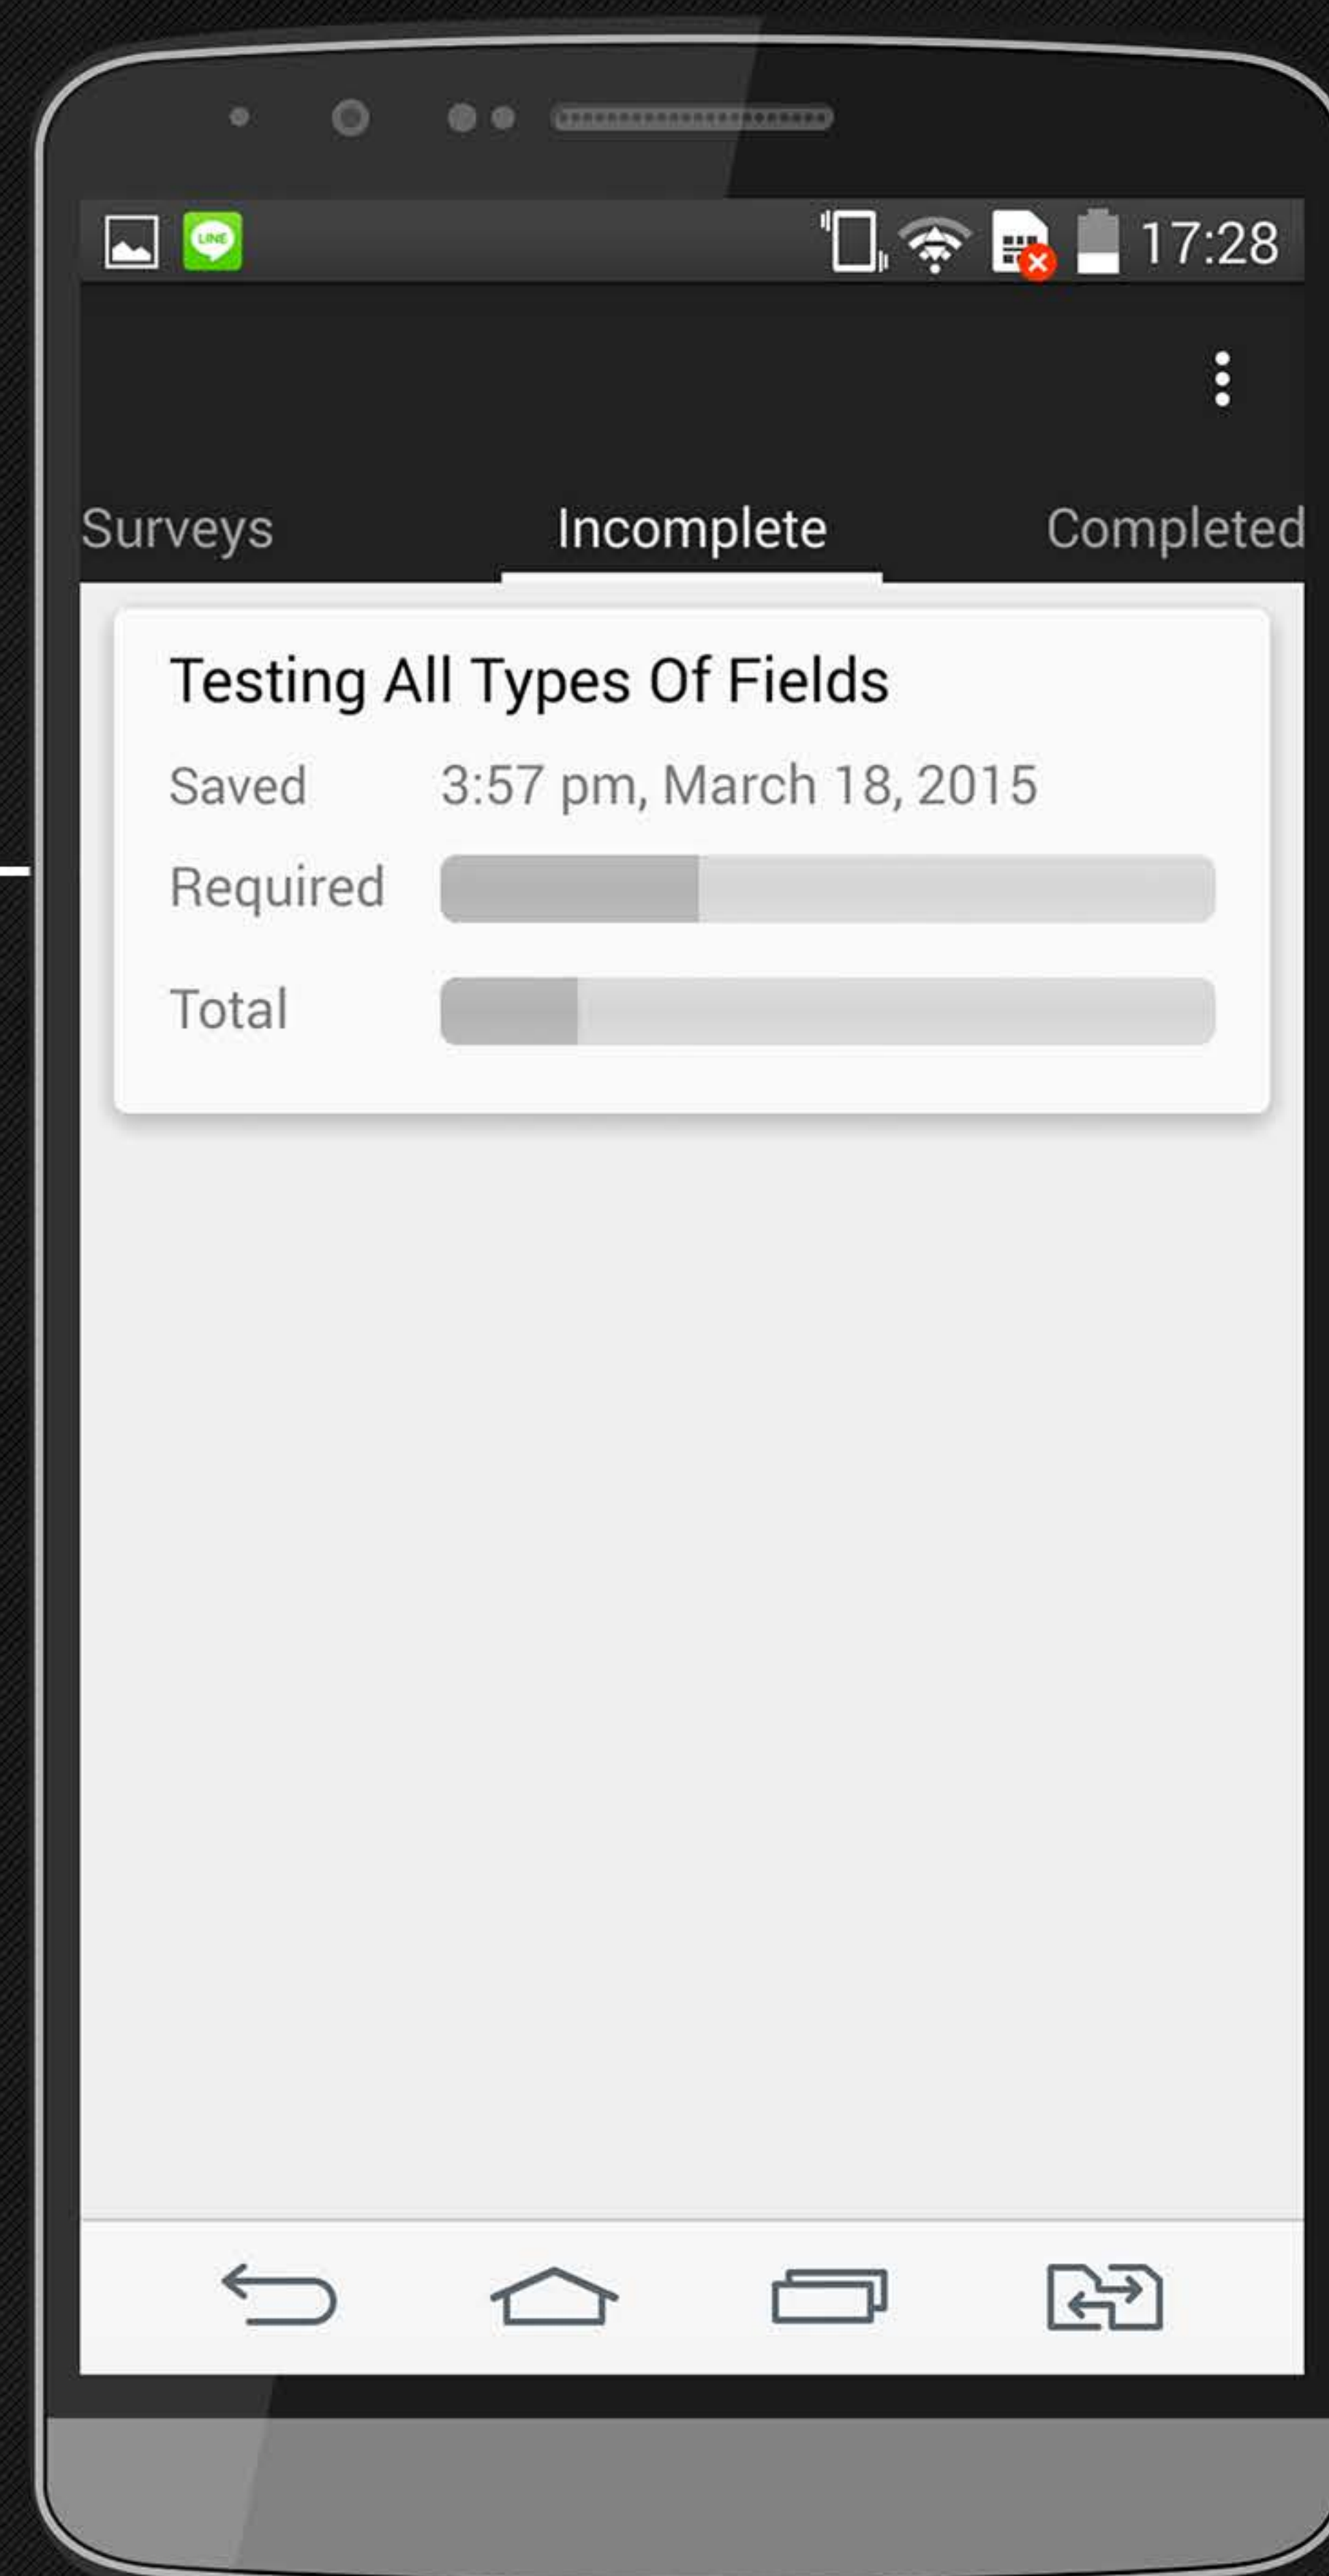

* requires internet access
